The XIS-100X is a versatile X-Ray Inspection System with a tunnel size of 101.6 cm x 101.3 cm (40" x 40"). The XIS-100X is designed for screening oversized luggage, large parcels and small cargo.

The XIS-100X is a flexible, mid-sized system with ideal tunnel dimensions for diverse screening capabilities. The XIS-100X has the optimum tunnel size for maximized object screening with a minimized system profile. Thus, the system offers high throughput and improved efficiency for mid-level screening needs.

Ultimately, the XIS-100X is the cost effective screening solution for airports, customs facilities and high security sites.

An exclusive Astrophysics option is our 6 Color Imaging, which enables operators to view screened objects in 6 colors, each color correlating to a specific range of Atomic Z-Numbers. 6 Color Imaging enables operators to achieve optimal material identification which improves throughputs.

Astrophysics is committed to providing quality products and services nationwide. We listen to our customers and offer customizations and order flexibility based on their needs.

Backed by a team of engineers from our City of Industry, California center of excellence headquarters, Astrophysics designs cutting-edge X-ray screening technology for detecting weapons and contraband for transportation, ports, borders, critical infrastructure and other industries that present security risks.

Astrophysics is headquartered in the United States and maintains a global presence with service delivery worldwide. Astrophysics is committed to global safety and is proud to present this new age of screening security—driving the industry into the technology of tomorrow.
