

Garrett Releases New Axiom Metal Detector

Garland, Texas (July 26, 2022) –Texas-based Garrett Metal Detectors today announced the release of a new high-performance pulse induction gold prospecting metal detector, the Garrett *Axiom*.

“The release of *Axiom* is significant for anyone interested in gold prospecting,” says Steve Moore, Director of Marketing for the company. “*Axiom* is the most powerful gold detector Garrett has ever designed, and it is packed with technology to help users easily overcome the difficult soil conditions where gold nuggets are traditionally discovered.”

Garrett’s *Axiom* detector includes built-in technology to make it highly sensitive on even the smallest sub-gram weight gold nuggets. Users have a full range of adjustments to suit their hunting styles, including: four search mode options; four ground track options; two audio tone options; and six searchcoil options. *Axiom* is revolutionary in that the unit is very lightweight, is rechargeable and software upgradeable, and is priced far below the standard price of competitive high-end pulse induction gold detectors.

In a live product announcement this morning, Garrett CEO Steve Novakovich stated, “Garrett is committed for the long haul to the gold prospecting market.” Novakovich cited Garrett’s release last year of the popular *Goldmaster 24k* high-frequency VLF prospecting detector as further evidence of the company’s renewed focus.

Each *Axiom* detector ships with two searchcoils, a pair of headphones, a soft travel case, and a backup battery pack, allowing the machine to operate on AA-size batteries if a recharging source is not immediately available. Full product details, including videos and instruction manuals, can be reviewed on garrett.com.

About Garrett Metal Detectors

Garrett Metal Detectors, co-founded by electrical engineer Charles Garrett and fourth generation educator Eleanor Smith Garrett, is the global leader of metal detection products for security and law enforcement applications worldwide. For almost six decades, Garrett has engineered the most advanced metal detection products, including walk-through, hand-held, and ground search metal detectors for the security industry. Garrett is an International Standards Organization (ISO) 9001:2015 certified company.
